DETAILED ACTION

1. Applicant's preliminary amendment dated 5/25/06 has been entered.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 7-12, drawn to a device for separating flat consignments.

Group II, claim(s) 1-6, drawn to a method for separating flat consignments.

3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I, (claims 7-12) explicitly requires a control unit for changing the speed of take off elements in an acceleration stage, while Group II (claims 1-6) merely recites that the speed of take off elements in an acceleration stage is changed, without reciting any specific structure for performing this speed change. In other words, there is no requirement whatsoever in Group II (claims 1-6) for a control unit, while Group I (claims 7-12) explicitly requires a control unit for changing the speed of take off elements. Keeping this difference between Groups I and II in mind, some sort of braking mechanism, clutch mechanism or other speed control mechanism can be relied upon by the examiner to meet the take off element speed change limitations of Group II (claims

Art Unit: 3653

1-6), rather than having to rely upon a control unit to change the speed of the take off elements, as is required in Group I (claims 7-12). Accordingly, Groups I and II lack the same or corresponding special technical features, because Group II (claims 1-6) does not require the same control unit that is required in Group I (claims 7-12).
